

# If You're Scared of Climate Change

low G

*Tune: 'If You're Happy and You Know It Clap Your Hands'; 1.5 min.*

*Lyrics: The Raging Grannies ... and Their Friends of Westchester County NY*

If you're scared of global warming, pull the plug.  
When you step out of a room, flip the switch.  
Put your gadgets on a pow'r strip  
Turn them all off with just one flip.  
If you **want** to save the planet, pull your plug.

If you're scared of climate change, use less gas.  
Plant clover in your lawn instead of grass.  
Buy cars hybrid or electric.  
Share your ride. The train's terrific.  
If you **want** to save the planet, use less gas.

If you're scared of global warming, change your fuel.  
You know nukes are never green and coal's not clean.  
Wind and solar generate,  
And they don't contaminate.  
If you **want** to save the planet, change your fuel.

These changes are too costly some might say. But since we  
love our planet, we will pay.  
Global warming we must banish.  
If we don't our world might vanish!  
So, **make** the world a safer place to stay!
